TO EVERYTHING WE DO.

VALUES

SAFETY

Safety is of paramount importance to our operations and we are dedicated to the continuous assessment, review and reconfiguration of safety management systems to reflect and support the evolving work environment. Advanced Aircon strives for the highest standards in WH&S. The prevention and minimisation of risks, injuries, illness, and accidents is achieved through a strong and permeating culture of education, risk management, and the application of cohesive remedial procedures.

INTEGRITY

Engaging with our clients and having transparency is essential to our company. It is through the facilitation of robust dialogue where we aim to ensure the clarity of our objectives and outcomes, while appropriately managing expectations between employees and clients. Advanced Aircon aims to be your trusted company, by ensuring the best work every step of the way.

RELATIONSHIPS

Establishing and maintaining partnerships with our clients, suppliers, employees and more broadly, the communities in which we work, is an integral function of our business. We recognise the significance of these working relationships and place a high priority on investing time and resources into maintaining affiliations that are mutually beneficial, productive and respectful.

CONTINUOUS IMPROVEMENT

At Advanced Aircon our continuous improvement methodology empowers us to regularly review our performance and identify areas of improvement, directly benefiting our clients and employees. With software implementation as well as our emphasis on Quality Assurance, we believe that our processes allow our customers to reduce overall costs and improve efficiency.

OUR JOURNEY BEGINS HERE

SALES

At Advanced Aircon we have various types of air conditioning units for both domestic and commercial applications.

Ventilation systems are also available for most air extraction situations. Our sales team can supply all components, installation and maintenance of your air conditioning system, all at competitive pricing with finance available to approval customers.

DESIGN

Our professional design team can custom build air conditioning systems to suit your property and personal needs.

We also design mechanical ventilation systems for both domestic and commercial applications.

INSTALLATIONS

We have a dedicated and experienced team of installation technicians who are professional, friendly and courteous to ensure your experience is pleasant. Our team take pride in their work providing a high standard of workmanship.

All our technicians follow a strict protocol to ensure they offer a professional service every time we visit your premises.

DELIVERING AN UNCOMPROMISED APPROACH TO QUALITY

SERVICE MAINTENANCE

We have a wide knowledge and understanding of every project we work on and from this we can determine and rectify issues immediately.

After the construction period has finished, we offer a comprehensive follow on maintenance and repair service, because we constructed the job, this makes us well equipped and qualified to continue the on-going maintenance. We have intimate knowledge of projects which has been gained through the construction period, meaning we can quickly ascertain and rectify any issues, saving our clients time and money.

Our clients are backed by our service division with prompt attendance by our fully qualified and experienced service team who will quickly rectify any problem which may arise.

MANAGEMENT SYSTEM

Advanced Aircon has established an integrated management system which meets the requirements of AS/NSZ 9001:2008. With an aspiration to deliver a consistent approach to all our clients and to meet all workplace health & safety, environment and quality requirements.

DEDICATED TO
PROVIDING THE **HIGHEST**
